ABOUT ME

Aspiring Data Analyst with a background in software development and quality assurance. My experience in development and QA gave me a practical understanding of how data is generated, validated, and used inside real systems.

I've worked on web applications, APIs, databases, and software testing processes, developing a strong attention to detail and a quality-oriented mindset. Through these experiences, I became especially interested in data analysis, reporting, and extracting useful insights from complex information.

Currently pursuing a degree in Data Science & Artificial Intelligence (graduating in 2026), while strengthening hands-on skills in Python, SQL, data analysis, and reporting.

What I bring to a data team:

- Python and SQL skills for data extraction and analysis
 - Experience working with APIs, databases, and structured data
 - Strong focus on data quality and validation
 - Ability to communicate findings clearly and create structured reports
 - Technical background that helps bridge development and business needs
-

Work Experience

Freelance – Full Stack Web Developer (2023–2025)

- Designed and optimized **MySQL database queries** to improve data retrieval speed and application reliability
 - Built and consumed **RESTful APIs**, managing data flows between front-end and back-end systems
 - Applied **data-driven debugging** to identify performance bottlenecks and improve system behavior
 - Worked independently across the full data lifecycle: from database design to front-end data display
-

Platzi – Quality Control Analyst (2022–2023)

- **Analyzed educational content data** to assess quality, identify inconsistency patterns, and ensure accuracy across platforms
 - Generated **structured quality reports** with metrics and findings, shared with cross-functional teams to drive content improvements
 - Tracked and monitored **KPIs related to course performance** and student engagement to support strategic decisions
 - Collaborated with instructional teams translating data insights into actionable improvement plans
-

Rise of Champions – QA Tester / Beta Tester (2020–2021)

- Designed and executed **manual and automated test cases** (Selenium), documenting defect patterns and behavioral data
 - Produced **structured bug reports** with reproducible steps, severity classification, and impact analysis
 - Contributed to product quality metrics, supporting data-informed decisions by the development team
-

Education

1. **Data Science & Artificial Intelligence** – Instituto No. 213 (*In progress - 2026*)
 2. **Software Development** – ISFT12, La Plata (2023)
-

Courses & Certifications

Data Analysis & Data Science

- Data Analysis with Python – Platzi, Bootcamp
- SQL & Databases for Data Analysis – Platzi
- Statistics & Probability for Data Science – Platzi
- Python for Data Science – Platzi
- Machine Learning Fundamentals – Platzi
- Data Visualization with Python – Platzi

Software Development

- Full Stack Developer – Argentina Programa
- Back End Developer – Node.js Bootcamp)
- Front-End Developer – Oracle Next Education
- React & JavaScript Development – Platzi

QA & Professional Skills

- Software Testing & QA Automation – Platzi, TalentoTech
 - Selenium Testing Fundamentals – Platzi
 - Agile / Scrum Fundamentals – Platzi
 - Effective Communication & Feedback – Platzi
 - Teamwork & Professional Communication – Platzi
-

Technical Skills

Data & Analytics

Python · SQL · Data Analysis · Data Cleaning · Data Visualization · Reporting · Excel · Jupyter Notebooks · Statistical Analysis

Libraries & Tools

Pandas · NumPy · Matplotlib · Seaborn · Git · REST APIs

Machine Learning

Regression Models · Classification Models · Scikit-learn

Development & Workflow

JavaScript · React · Agile / Scrum · QA Testing · Selenium
